RENEWAL WORKBOOK / 1 OF 3

Define the comparison

Compare two documentation workflows in the same clinic before committing to a broader renewal.

Set the scope before looking at usage

Clinic and accountable owner

Measurement period and renewal horizon

Eligible visit types, staffed sessions and supported languages

Current documentation workflow

Proposed workflow and fallback

Compare similar clinicians, visit types and languages. Record case mix or staffing differences.

Record the counting rules

Count each eligible completed visit once, whether or not the tool is offered, used or works. Track declines and failures separately. Count notes signed by the clinic's existing deadline, including notes completed by hand.

Existing note signing deadline

Encounter roster and missing data owner

How to use this workbook

Download before filling. Use a PDF viewer that supports forms. Save a copy, reopen it and check your responses before sharing. Record aggregate counts and references. Keep patient identifiers in approved systems.

RENEWAL WORKBOOK / 2 OF 3

Price the whole workflow

Enter current and proposed figures for the same period. Include units, denominators and the source or gap for each line. Calculate rates separately and enter the results here.

01 Vendor and implementation spend

Procurement + IT. Record license, overages, hosting, interfaces, implementation, validation and training in dollars. Separate one-time and recurring costs. Check billing events per visit.

Current figure / rate	Proposed figure / rate	Source, assumptions or missing data

02 Documentation work

Informatics + clinic manager. Active person-minutes / eligible completed visits. Include notice, troubleshooting, review, corrections, after-hours work and hand documentation. Break out time by role.

Current figure / rate	Proposed figure / rate	Source, assumptions or missing data

03 Patient choice and fallback

Patient experience + clinic ops. Record offers / eligible visits and declines / offers. For declines and failures separately, record notes signed on time / visits in each group.

Current figure / rate	Proposed figure / rate	Source, assumptions or missing data

04 Quality and ongoing controls

Quality + IT. Consequential errors / independently audited signed notes. Record counts, missing records and monitoring, support, revalidation and remediation costs.

Current figure / rate	Proposed figure / rate	Source, assumptions or missing data

05 Cash and capacity

Finance. Incremental cash per eligible completed visit and over the term. Count paid labor once. Record existing staff time and potential capacity separately. Verify cash gains in payroll or ledger.

Current figure / rate	Proposed figure / rate	Source, assumptions or missing data

RENEWAL WORKBOOK / 3 OF 3

Make the renewal decision

Document who owns the evidence, which documentation paths work, and the scope and spend you can support.

Test the path when the tool goes unused

Notice, recorded patient choice, withdrawal, interpreter support and failure fallback

Vendor data rights, permitted use, retention and exit terms

Choose one disposition

- ○ Renew / expand
- ○ Cap scope / evaluate
- ○ Fix fallback first

Evidence and reasoning for the decision

Approved scope and spending cap

Decision / next review date

Open evidence gaps, named owners and due dates

Finance sign-off

Clinic operations sign-off

Clinical quality sign-off

Expand only where the budget covers both paths and quality supports the proposed use. Keep scope and spend capped while evidence is incomplete. If staff cannot reliably complete documentation when the tool goes unused, fix the fallback before adding sites.
