

EXECUTIVE DECISION WORKBOOK

CAN YOU DEFEND THE FINANCIAL RESULT?

A fillable approval record for AI coding, capacity, cash, risk, and durability claims.

BUILT FOR THE APPROVAL MEETING

CFO | COO | REVENUE INTEGRITY | COMPLIANCE | CIO / CAIO

AUGMENTED LEADERSHIP HQ

Version 1 | October 2026

Start with one claim and one decision

Do not approve a composite ROI percentage. Name the exact financial outcome, comparison period, and decision it is meant to support.

ORGANIZATION

AI WORKFLOW OR VENDOR

REVIEW DATE

EXECUTIVE SPONSOR

COMPARISON PERIOD

DECISION DATE

EXACT FINANCIAL OUTCOME BEING CLAIMED

DECISION THIS EVIDENCE MUST SUPPORT

KEEP THE ENDPOINTS SEPARATE

Allowed spending, modeled capacity, avoided work, and realized net cash are not interchangeable. Record each as a separate claim with its own denominator and owner.

MEETING RULE

If the evidence packet cannot show what changed, why it changed, where value was captured, and how the claim can be defended, approve a bounded evaluation rather than expansion.

Reconstruct, attribute, capture, and defend

Complete all four gates for the specific benefit being approved. Unknown values remain unknown.

1 RECONSTRUCT

Can the team trace the claim from source event to financial result?

EVIDENCE AND COMPARISON

☐ Pass ☐ Gap named ☐ Fail

2 ATTRIBUTE

Can the team distinguish AI effect from case mix, demand, staffing, policy, contract, and other technology?

EVIDENCE AND COMPARISON

☐ Pass ☐ Gap named ☐ Fail

3 CAPTURE

Did released time, improved coding, or avoided work become collected contribution or removed expense?

EVIDENCE AND COMPARISON

☐ Pass ☐ Gap named ☐ Fail

4 DEFEND

Can compliance, finance, and operations reproduce the logic after denials, appeals, exceptions, or model changes?

EVIDENCE AND COMPARISON

☐ Pass ☐ Gap named ☐ Fail

Put each benefit on its own line

Use the evidence packet to keep coding, actual use, capacity, net cash, and durability from collapsing into one headline ROI number.

CLAIM	ACCOUNTABLE OWNER	EVIDENCE AND COMPARISON	STATUS	DECISION USE
Coding change	Revenue integrity + compliance	Clinical support, reviewer action, final claim, payment, denial and appeal.		Continue, narrow, remediate, or pause.
Actual use	Operational owner	Eligible cases, assisted cases, overrides, failures, version, and adoption period.		Right-size or repair adoption barriers.
Capacity	COO / service line	Completed cases or filled slots against staffed sessions, cancellations, and overtime.		Expand only if the chain can absorb demand.
Net cash	CFO + controller	Collected contribution plus removed expense less implementation and operating cash cost.		Renew, renegotiate, evaluate, or stop.
Risk and durability	Compliance + CIO	Exceptions, audit results, model changes, retained benefit, and response triggers.		Pause, remediate, or revalidate.

NAMED GAPS, LOCAL THRESHOLDS, SAMPLE SIZE, AND ESCALATION TRIGGERS

Record what the evidence authorizes

A decision is complete only when scope, conditions, owner, next evidence, and recheck date are explicit.

☐ Renew

☐ Expand

☐ Bounded evaluation

☐ Narrow

☐ Pause

☐ Stop claim

EXACT APPROVED SCOPE AND EXCLUSIONS

CONDITIONS AND RESPONSE TRIGGERS

ACCOUNTABLE OWNER

NEXT EVIDENCE DUE

RECHECK DATE

EVIDENCE THAT WOULD CHANGE THE DECISION

☐ Denominators and comparison are explicit

☐ Incremental costs are included once

☐ Unknowns remain named

☐ Compliance can reconstruct material coding changes

☐ Finance can show value capture

☐ Recheck is scheduled
